16 fl oz	99284 82292	12	99284 97594
32 fl oz	99284 01805	8	99284 52450
1 gallon	99284 65320	4	99284 04101

# APPLICATION INSTRUCTIONS

## For Best Results:

Spray dry plant leaves, stems, flowers, tree bark and branches that need protection until run-off occurs or plants look wet. For extra protection on low-growing plants, spray soil around the plant base as well.

**Spray treatment:** For vegetables and fruit targeted for human consumption, spray on stems and leaves.

Drying period depends on weather conditions. Under low humidity conditions, drying is expected to take a maximum of 6 hours. Once dried, TRICO® Home & Garden provides superior rain resistance.

### Use a hand-held, knapsack or garden sprayer with a flat fan or cone nozzle. Information for use:

- Apply only at temperatures between 35° F and 85° F.
- Avoid application in direct sunlight on hot days to avoid damage to leaves. For best results, apply in the early morning or late afternoon.
- Before large-scale treatments or application in combination with other products, test product on a small area of that plant type to avoid possible plant damage. Use with caution on open blooms and sensitive varieties such as impatiens, fuchsia, and begonias.
- Do not apply more than 16 fl. oz. of product per 2,550 sq. ft.
- Do not exceed six applications per year.

# FOLIAR APPLICATION
